

Rtype::Systems::HealthSystem
::tick

```
graph LR; A["Rtype::Systems::HealthSystem::tick"] --> B["ECS::Entity::getComponent"]; A --> C["ECS::Entity::has"];
```

The diagram illustrates two function calls originating from the `Rtype::Systems::HealthSystem::tick` function. The source function is represented by a grey rectangular box on the left. Two blue arrows point from the right side of this box to two separate white rectangular boxes on the right. The top arrow points to the `ECS::Entity::getComponent` function, and the bottom arrow points to the `ECS::Entity::has` function.

ECS::Entity::getComponent

ECS::Entity::has
